01

Who We Are

Broadway Infosys has been Nepal's corporate digital transformation partner for 16+ years, having partnered with 500+ businesses to address critical IT skill gaps. Our ISO-certified sector-specific training model delivers tangible productivity gain of up to 40%.

Through the integration of global standards and local expertise, we make workforces competitive assets by providing tailored programs in 70+ technologies and 155+ courses. We convert organizational obstacles into strategic strengths with our 95% client retention and hybrid delivery approaches through on-site, virtual, and blended means.

Our end-to-end solution is more than typical training by involving extensive post-implementation support, performance measurements, and continuous curriculum enhancement that provides long-term ROI to corporate partners.

We have strategic partnerships with world-leading technology companies, which enable us to offer updated content that specifically addresses shifting industry needs while helping organizations measure training effect using multiple methods.

Why Choose Us?

500+

Companies Trained

85+

Industry-Certified
Trainers

5 years+

Experienced Trainers

Training Since
2008

Founded in 2008, Broadway Infosys has evolved from a local training center into Nepal's premier IT education provider with a global footprint extending to the United States. Guided by our vision to "empower society through tech-competent professionals," we've trained hundreds of professionals from 500+ companies through strategic alliances with leading certifications including Microsoft, Cisco, and AWS.

Our 85+ industry-certified trainers bring an average of 5 years' field experience to corporate programs, while our 18+ advanced facilities feature enterprise-grade labs, 24/7 security, and hybrid learning infrastructure. As Nepal's only IT trainer with ISO certification and U.S. operational presence, we deliver international standards with localized relevance.

1 Client-Centric Customization

Broadway Infosys tailors each corporate training program to the unique needs and goals of its partner organizations, ensuring content is relevant and immediately applicable to real-world challenges.

2 Results-Driven Focus

Results-Driven Focus

Every curriculum is designed around clear, measurable business outcomes, whether that's boosting productivity, improving team collaboration, or achieving a specific return on training investment.

3 Continuous Innovation

By integrating the latest industry trends, tools, and methodologies, Broadway Infosys equips participants with forward-looking skills that keep them ahead of technological shifts.

4 Scalable Learning Solutions

Modular training frameworks allow for seamless scalability, accommodating teams of any size, from a focused department workshop to an enterprise-wide rollout.

5 Expert-Led Facilitation

Our facility includes fully-equipped computer labs, ergonomic seating, and a professional learning environment.

6 Practical Application Orientation

Emphasis on practical labs, simulations, and real-world case studies ensures learners can immediately apply new skills in their daily workflows.

7 Collaborative Partnership

Broadway Infosys works closely with HR heads, managers, and department heads to co-create a training roadmap and timeline that aligns with organizational objectives.

8 Lifelong Learning Culture

Post-workshop resources, such as access to online portals, refresher sessions, and alumni networks, reinforce long-term skill retention and continuous growth.

9 Quality Assurance & Feedback Loop

Pre-and post-training assessments, regular check-ins, and structured feedback mechanisms enable ongoing refinement of program effectiveness and learner satisfaction.

10 Ethical & Inclusive Environment

Every training initiative upholds respect, diversity, and transparency, ensuring that all participants feel valued, supported, and empowered to contribute.

03

Training Modes

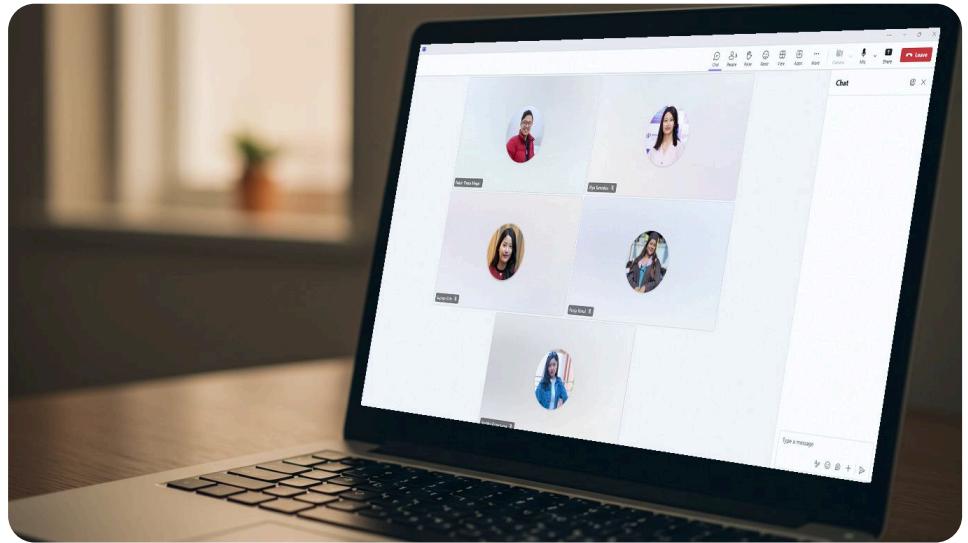

Our proprietary 5-phase corporate training framework begins with a complimentary Training Needs Analysis (TNA), a diagnostic deep-dive into your organization's skill gaps, technology stack, and business objectives.

This informs our agile curriculum design process, where we co-develop modules with your technical leadership, embedding client-specific case studies and sandbox environments. Delivery occurs through flexible channels.

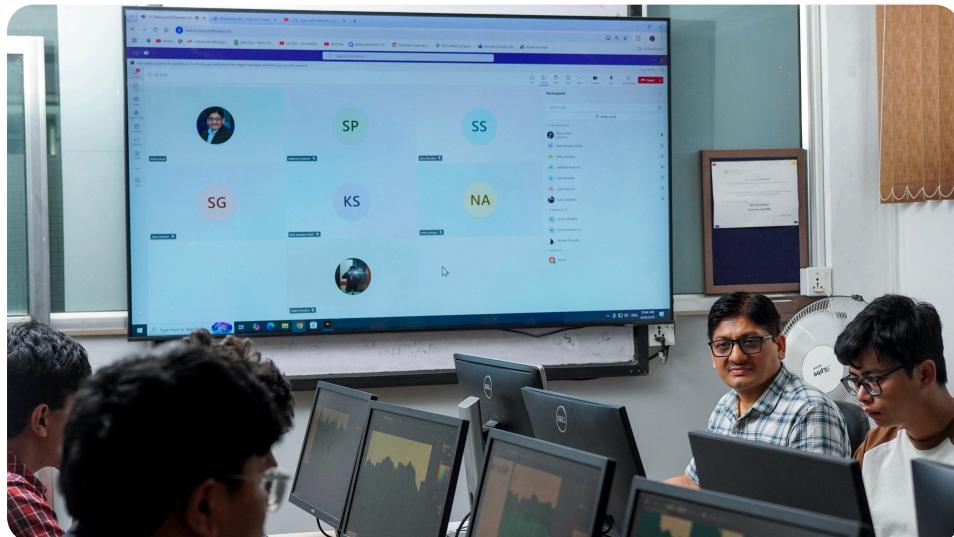

On-site Corporate Training

Dedicated trainers deliver tailored programs in your own premise, minimizing disruption and facilitating team collaboration and applied learning.

Virtual Live Training

Real-time interactive sessions on Microsoft Teams with breakout rooms so remote teams can join at the same time from various locations.

Hybrid learning solutions

Workforces can seamlessly transition from in person to virtual participation based on schedules, travel constraints, or project demands.

Enhanced Learning Management

Lifetime access to training materials, interactive assessments, and bite-sized learning modules that reinforce key concepts and enable just-in-time skill application. Our integrated platform supports ongoing professional development with downloadable resources, practice labs, and reference guides that teams can leverage long after formal training completion.

04

Corporate Training Portfolio/Expertise

We address industry-specific challenges through given strategic domains:

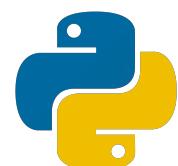

Cloud & DevOps

AWS/Azure Certification Programs,
Kubernetes, and CI/CD Pipeline Engineering

Coding/Programming

Java/Python Enterprise Development,

Vertical specialization: Programs are tailored for any organization needs and are customized as per the requirement analysis.

05

Trainer

Excellence

Our 85+ corporate trainers undergo rigorous selection requiring:

- Vertical specialization: Telecom, Banking, Governmental Organizations, NGOs, Healthcare, Educational Enterprises, and more.
- Assistant trainer provision for installation, facilitation, dedicated communication, and other required support during the training.
- Trainers with industry exposure and real-world expertise, ensuring practical, job-ready learning.
- Minimum 5 years' industry experience with active certifications.
- Certified training through the Learning Partner Program.

06

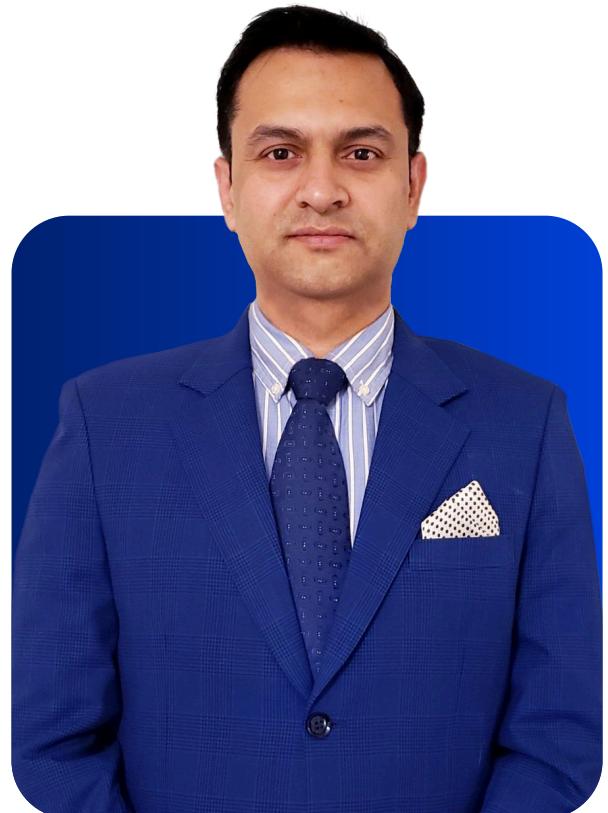

Message from our Founder/CEO

Broadway Infosys has come a long way from its modest startup to emerge as Nepal's top corporate IT training partner with more than 500 organizations across sectors. From a niche business with a few carefully chosen courses, it has evolved as a complete corporate training solution with 70+ industry specific course with a total of 155+ courses and 85+ seasoned industry experts

Our corporate training programs have adapted to meet the changing needs of modern businesses, from traditional classroom environments to virtual learning platforms and blended models. This approach enables us to serve multinational corporations, virtual teams, and globally dispersed organizations across Nepal and globally.

Our enterprise services today cover customized corporate training programs, technology consulting, and workforce development solutions addressing skill gaps and productivity. Broadway Infosys is known for our experienced management, veteran corporate trainers, cutting-edge infrastructure, and experiential learning settings that facilitate actionable business results.

Our international expansion with Broadway Infosys USA since 2016 is a testament to our commitment to international corporate clients. This is just the beginning of our expansion.

Our goal is to become South Asia's most trusted partner in corporate training. We help companies get real business results by offering smart training programs that strengthen their teams and help them do better in the market.

Raju Adhikari

Founder/CEO, Broadway Infosys
